

CTN Injury Prevention Subcommittee
Date: 11/12/2020 Time: 11:30 am
Location: Virtual Meeting
Duration: 1.5 hours

AGENDA					
Agenda Category	Topic/Report	Discussion	Action to Take	Responsible / Date for Follow Up	Loop Closed?
Introductions					
Minutes approval					
Business items	IP Newsletter	A December newsletter draft was presented to the committee by Alison and Jasmine for feedback. They thought with the uptick in social isolation and the possibility of seniors being with their families for the holidays it would be better to get the newsletter out before the holiday season vs. in January. Committee members will put their own information under the virtual falls prevention program column, and their contact information at the end. Everyone loved the newsletter and no changes were recommended.	Continue with schedule of those putting together the newsletter.		
	GDL Flyer for Healthcare Providers	The healthcare committee of the Colorado Young Drivers Alliance (CYDA) has created a flyer of talking points for providers to discuss with teens and their parents around GDL. The committee received youth feedback they will incorporate into the flyer, and will also get provider feedback before they finalize. They would like the CTN committee members to think about how they could push this idea and the flyer to their providers during a yearly or sports physical with teens.			
	CDPHE Youth Partnership for Health	CDPHE has created a Peer Advisory Council for youth to provide feedback on any materials created to impact youth. The healthcare committee of CYDA presented the GDL flyer at their November meeting. They received very helpful and specific feedback to improve the flyer, and processes for having a discussion with teens. This is a great resource for anyone creating materials to educate youth on safety topics. Lorin Wakefield can be contacted at lorin.wakefield@state.co.us for more information or to			

	Virtual Programs	<p>schedule some time at their monthly meeting. Their website is https://www.colorado.gov/pacific/cdphe/ypf.</p> <p>UCHealth (Alison) – Recently back to doing injury prevention as had been diverted to Covid related work. Have been doing in person car seat classes with small numbers. Scheduled a GDL virtual class with Windsor Fire who pushed it out. They had 6 families signed up for a total of 12 people but no one actually showed up for the virtual presentation. They will hold off on more programs and figure out next steps to get people to “show up”.</p> <p>Children’s Hospital (Amanda) – Have been doing one on one car seat checks outside. Collaborating with SafeKids to do a pilot bike helmet safety program virtually. Will do online quizzes and have a jingle submission focused on safety messaging. The winner will receive a prize. They hope to utilize this format with other safety messages if the pilot is successful.</p> <p>Lutheran Hospital (Jasmine) – Have been doing Stop the Bleed virtually. Lecture is provided over a video call for the full group and the skills training is done 1 to 1 virtually for skills check off. Also implemented a passport game for older adults and falls prevention but didn’t have any participation. A barrier was that independent living facility staff are working offsite due to Covid so it was hard to get their engagement and have them engage residents when they are not onsite. Will be doing a survey to see what older adults want for programming during this time.</p> <p>St. Anthony’s and Penrose (Robert and Angela) – Have been doing a falls prevention webinar that has been going well. They have around 8-9 participants on the call but the recordings have seen more utilization. They will be putting the webinars on You Tube. The December webinar is on how to be resilient during the holidays after a trauma has occurred. Will be putting together 5-15 minute school links on different safety topics to market to schools. Also considering implementing a contest for schools where students will create a 1-2 minute safety message. These will be posted to a website where they can be voted on. Angela mentioned that Stepping On is exploring some virtual options so stay tuned.</p>			
--	------------------	--	--	--	--

		<p>UCHealth (Lori) – Had a full Stepping On class scheduled that was recently cancelled. Will provide a weekly phone call or email to check in and help anyway they can. The Injury Prevention and Research Institute through Memorial Hospital received the Next 50 grant which they are piloting in Teller County. Looking to run 8 participants per session utilizing a virtual program. They will use iPads with a hotspot and provide home visits. They will do the TUG test and pre/post tests. They hope to make a research project out of it. Lori has participated in 2 national virtual support groups through TSN. She is working to set up local support groups.</p> <p>UCHealth (Laurie) – Created online PARTY program consisting of 5 modules that teachers can facilitate themselves or have coordinators facilitate. They can also choose to do all 5 modules or any of the 5. All have been created as individual modules. Coordinators have been marketing to schools with limited success. Teachers seem interested in doing the modules this Spring once things have calmed down a bit. One teacher did run 87 students through Module 1 and said it went really well, the students were engaged, and good conversation happened. Will also be rolling out online falls prevention program shortly.</p>			
IP activities update	<p>Stop the Bleed</p> <p>Stepping On</p>	<p>Robyn provided a legislative update on Stop the Bleed. A bill has been drafted and was sent to local a representative. They are waiting for an aide to put into legal form. The bill requires STB training for all school employees and in at least one health class for 9-12 graders. No funding will be put into this bill due to Covid but one of the representatives may have some private funding available to support placing STB kits in schools. Currently contacting schools to see if they've had training or have kits in their school. They have found that more schools are trained in rural areas. Bill will be introduced in March.</p> <p>Lori had a STB class that was cancelled but will run 2 separate virtual classes with 4 in each class.</p> <p>Stepping On Leader Training just approved so will be running in person at Penrose Hospital with social distancing guidelines in place. Currently 13 people registered.</p>			
CTN Website		Laurie will add December newsletter and November meeting minutes to the website. CTN is adding a social			

		media piece and Jasmine will be the lead on this. More to come.			
		January 14, 2021 from 11:30-1:00 on zoom			
Adjournment					

Members: Laurie Lovedale and Angela Kedroutek (Co-chairs), Robyn Wolverton, Darcie Bentz, Lori Morgan, Marilyn Johnson, Mike Archuleta, Alison Weston, Lauren Stenger, Jasmine Patriquin, Nicole Gordon, Robert Hayes, Maggie Savely, Tai Grandinetti, Melanie Wuzzardo, Amanda Abramczyk-Thill
